

GOOGLE ADS CASE STUDY

How We Built a High-Intent Google Ads Lead Generation System

Confidential Specialist Healthcare Client · Perth, Australia

THE CLIENT

Confidential Specialist Healthcare Clinic

A specialist medical practice in Perth focused exclusively on scar management and improvement — serving patients with complex, sensitive treatment needs.

- Laser scar treatment
- Surgical scar revision
- Scar therapy
- Keloid and complex scar types
- Post-surgical, trauma, and burn scars

The Challenge Wasn't Traffic. It Was Intent.

Potential patients were searching for solutions to their specific scar problem — not for the clinic by name. Generic campaigns were capturing clicks without capturing qualified enquiries.

Highly specialised niche

Scar treatment requires precise, careful messaging — not broad healthcare advertising.

Expensive healthcare clicks

Medical CPCs in Perth are among the highest on Google Ads. Waste is costly.

Multiple search intents

Patients search by problem, treatment type, and location — all requiring distinct targeting.

We Built the Campaign Around Search Intent

Each campaign and ad group was structured around a specific treatment or patient intent — ensuring every click came from someone actively seeking a solution.

Search intent was mapped to campaign structure — from broad awareness queries through to high-intent, treatment-specific searches — ensuring every click came from a qualified prospect.

From Broad Traffic to High-Intent Searches

Targeted Keyword Themes

- "scar treatment perth"
- "laser scar treatment perth"
- "scar revision perth"
- "keloid treatment perth"
- "burn scar treatment perth"

Search terms were continuously reviewed. Irrelevant queries were excluded through ongoing negative keyword optimisation – protecting budget and maintaining lead quality.

SEARCH INTENT → RELEVANCE → LANDING
PAGE → CONVERSION

The Ads Matched the Patient's Problem

Every ad was written to reflect the specific search intent behind each query — not generic clinic messaging. Relevance drives both Quality Score and conversion rate.

Headlines

Specialist Scar Treatment Perth · Laser & Scar Revision Options · Book a Scar Consultation

Description

Specialist treatment options for problematic scars, including surgical, trauma, burn and keloid scars. Explore your options with an experienced specialist team.

Messaging designed around relevance and patient intent — not aggressive promotional claims.

Search Intent → Relevant Landing Page

Traffic was directed to the most relevant service page — not the homepage. Alignment between search query, ad copy, and landing page is what separates high-converting campaigns from expensive ones.

Each search query routed visitors to the most relevant service page — maximising relevance and conversion efficiency.

We Optimised for Enquiries — Not Just Clicks

Every stage of the funnel was tracked and optimised — from first click through to consultation-ready lead.

Tracked Conversion Actions

Enquiry Forms Online contact submissions	Phone Calls Call tracking on ads and site
Booking Enquiries Appointment request actions	Click-to-Call Mobile call interactions

⚠ ILLUSTRATIVE RESULTS — REPLACE WITH VERIFIED ACCOUNT DATA

The Numbers Tell the Story

With only a 17% increase in monthly spend, the restructured campaign delivered dramatically more qualified enquiries at a fraction of the previous cost per lead.

+208%

Enquiry Growth

13 to 40 qualified leads per month

-62%

Cost Per Lead

From A\$231 down to A\$87.50

+113%

Conversion Rate

From 3.1% to 6.6%

■ Before

■ After

Before vs After

- **Before:** A\$3,000/mo · 420 clicks · A\$7.14 CPC · 13 leads · A\$231 CPL
- **After:** A\$3,500/mo · 610 clicks · A\$5.74 CPC · 40 leads · A\$87.50 CPL

A modest spend increase unlocked significantly more qualified enquiries — with cost per lead dropping by more than half.

Don't Optimise Google Ads for Traffic. Optimise It for Qualified Conversations.

A performance marketing approach built around intent, relevance, and measurable outcomes.

| More clicks don't necessarily mean more patients.

| High-intent search traffic is more valuable than raw volume.

| Landing page relevance directly influences conversion efficiency.

| Search-term optimisation is critical in specialised healthcare campaigns.
