How We Turned AUD 200/Day in Google Ads Into a High-Quality Lead Engine

How PS Digital moved from generic keyword targeting to high-intent service searches — generating leads that converted and creating a profitable upselling ecosystem.

PS DIGITAL

PERTH, AUSTRALIA

GOOGLE ADS

AUD 200/DAY

HIGH-INTENT LEAD GENERATION

PS Digital — Marketing Agency, Perth

PS Digital is a marketing agency operating in Perth, Australia. The agency was investing consistently in paid acquisition but was not generating enough commercially valuable leads from its advertising spend.

Industry Marketing Agency	Location Perth, Australia	Channel Google Ads	Daily Spend AUD 200
Primary Goal Qualified service enquiries			

The Problem Wasn't the Budget. It Was Search Intent.

PS Digital spent **AUD 200 every day** on Google Ads — but generic keywords attracted users at every stage of the buying journey, not just those ready to purchase.

A single generic keyword could represent five completely different user intents only one of which indicated commercial readiness. The advertising budget was being diluted across all of them.

⚠ AUD 200/day → Traffic ≠ Quality Leads

Search Volume Doesn't Equal Commercial Intent

The strategic turning point: instead of chasing high-volume keywords, we asked — **"What are people searching for when they're ready to buy this service?"**

✗ Before — Generic Keyword

"web development"

Possible intents: course, job, tutorial, information, or service — only 1 in 5 represents commercial intent.

✓ After — High-Intent Service Keyword

"web
development
services in Perth"

Intent: **Looking for a
provider.**

"python website
development
services near me"

Intent: **Looking for a
service provider.**

Ultimate Keyword Research Cheat Sheet

1. Understand Your Audience - Identify your target audience's pain points - Research the search terms they use for your service	2. Start with Seed Keywords - Use basic terms related to your niche or business - These are your starting point for generating broader keyword ideas	3. Use Keyword Research Tools - Google Keyword Planner: Check search volume and competition - SEMrush/Ahrefs: Discover related keywords and competitor strategies
4. Check Search Volume and Competition - Look for keywords with decent search volume but low competition - Long-tail keywords are often easier to rank for and have higher conversion rates	5. Focus on Long-Tail Keywords 3+ word phrases with lower search volume but higher conversion rates - Target more specific user intent for better ranking opportunities	6. Look for Low Competition Keywords - Identify terms with low competition (e.g., "discount") - Target keywords that are driving sales for your competitors
7. Analyze Your Competitors - Use tools like SEMrush or Ahrefs to see what keywords your competitors are ranking for - Identify gaps where you can outperform them with better content	8. Analyze Competitors' Keywords - Find out what keywords competitors are ranking for - Look for gaps where you can outperform them with better content	9. Localize Keywords - Add location-specific terms to capture local search intent - Useful for businesses with a specific geographic focus
10. Group Keywords by Intent - Classify keywords into service, informational, educational, and job-seeking intent - Match your content to the user's intent	11. Group Keywords by Topic/Theme - Cluster similar keywords to target multiple variations with one piece of content - Helps create comprehensive content around a central theme	12. Focus on User Intent - Classify keywords into informational, transactional, or commercial intent - Match your content to the user's intent behind the search
13. Refine with LSI Keywords - Use related terms or synonyms to give context to your main keyword - Helps improve content relevance without keyword stuffing	14. Refine with LSI Keywords - Use related terms or synonyms to give context to your main keyword - Helps improve content relevance without keyword stuffing	15. Monitor and Adjust - Regularly review keyword performance using analytics - Adjust your strategy based on ranking changes and user behavior

THE STRATEGY

We Refined the Keyword Architecture Around Buyer Intent

01

Identify Generic Keywords

Audited existing targeting to find terms where user intent was unclear or mixed.

02

Separate Search Intent

Classified keywords into service, informational, educational, and job-seeking intent.

03

Prioritise Commercial Keywords

Redirected budget toward specific, service-oriented searches like **"web development services in Perth."**

04

Optimise Around Lead Quality

The goal: fewer irrelevant enquiries, more qualified enquiries, and higher conversion rates.

Same Budget. Completely Different Economics.

Before

AUD 200/day

- Generic keywords with mixed intent
- Budget diluted across all search stages
- Irrelevant traffic and low-quality enquiries
- Poor conversion and unprofitable acquisition

After

Same AUD 200/day

- High-intent service keywords only
- Budget focused on commercial intent
- Qualified traffic and higher-quality leads
- ~70% **lead conversion** and upselling opportunities

The major improvement came from **strategy and intent refinement** — not from increasing the budget.

THE RESULT

Same Budget. Completely Different Economics.

70%

Lead Conversion Rate

Of acquired leads converted after the refined strategy was implemented

\$200

Daily Ad Spend

Same advertising budget — every dollar working significantly harder

We didn't solve the problem by spending more. We solved it by making every dollar work harder.

After implementing the refined Google Ads strategy, PS Digital began acquiring significantly more commercially relevant leads from the same daily advertising budget.

We Didn't Stop at Lead Generation

Once the advertising strategy began producing higher-quality customers, we identified another opportunity: **increase the value of each acquired customer.**

By introducing discounted upsell opportunities for complementary services, PS Digital generated additional value from customers already acquired, without increasing acquisition costs.

From Lead Generation to Customer Value Engine

The real transformation was not simply that PS Digital started generating better leads. The advertising strategy, conversion process, and upselling model began working together as one ecosystem.

The focus shifted from **"How many leads can we generate?"** to **"How much value can we generate from every qualified customer?"**

Better Targeting Can Outperform Bigger Budgets.

PS Digital didn't need to spend more. They needed to understand **search intent**, eliminate ambiguity from keyword targeting, focus budget on users actively looking for specific services, and maximise the value of every customer acquired.

Client PS Digital	Location Perth, Australia	Channel Google Ads
Budget AUD 200/day	Core Problem Generic keywords with unclear search intent	Strategic Solution High-intent, service-specific keyword targeting
Key Outcome ~70% conversion of acquired leads	Growth Strategy Discounted upselling of complementary services	Business Impact A more profitable customer acquisition ecosystem

Stop Paying for Traffic. Start Paying for Intent.

If your Google Ads are generating clicks but not customers, the problem may not be your budget — it may be **who you're targeting and why they're searching**.
